season in an episode called How to Build a Robot. This short film is a reply to narrative-driven Channel 4 Documentary.

How We Build a Robot

A robot perceives the world around it, and its own status, through sensors. Sensors can take in a broad range of information, including temperature, light conditions, positions of robotic components, and more. Environmental data is picked up and relayed to the processor so the robot can change actions accordingly and operate with little human input.
