P-51 Mustang | Facts, Specifications, & History | Britannica

The North American Aviation P-51 Mustang is an American long-range, single-seat fighter and fighter-bomber used during World War II and the Korean War, among other conflicts. The Mustang was designed in April 1940 by a design team headed by James Kindelberger of North American Aviation (NAA) in response to a requirement of the British Purchasing Commission.

North American P-51 Mustang - Wikipedia

Drawings of the P-51 Mustang, top right, are rare; they're typically only seen on dark and incomplete microfilm. Jungeberg, above right, sorted and dried engineering drawings in a friend's barn before rerolling and storing them three decades ago.

The Rolls Royce and Packard built Merlin engine is universally acknowledged as one of the finest piston engines that has ever been manufactured. Remarkably, over 50 years have elapsed since the last Merlin engine rolled off the production line, yet it is still in widespread daily use in warbird aircraft, including the P-51 Mustang.
